LITIGATION

18 CONSOLIDATED ACTION

Case No. 3:16-cv-00523 JCS

**DECLARATION OF JEFF FOCHTMAN
IN SUPPORT OF SEAGATE'S
OPPOSITION TO PLAINTIFFS' MOTION
FOR CLASS CERTIFICATION**

Judge: Hon. Joseph C. Spero
Date: March 30, 2018
Time: 9:30 a.m.
Dept.: Courtroom G

Filed Concurrently with DEFENDANT
SEAGATE TECHNOLOGY LLC'S
OPPOSITION TO MOTION FOR CLASS
CERTIFICATION

1 I, Jeff Fochtman, declare as follows:

2 1. I have personal knowledge of the facts set forth in this declaration, and, if
3 called as a witness, could and would competently testify to their truth.

4 2. I have worked at Seagate Technology LLC (“Seagate” or the “Company”)
5 for a total of ten years, first from October 2007–October 2009 and again from April 2012 to the
6 present.

7 3. I am currently employed as Seagate’s Vice President of Global Marketing.
8 From April 2012–August 2016, I was employed as Senior Director of Global Marketing. From
9 October 2007–October 2009, I was employed as Director of Consumer Product Marketing.
10 Although my level of seniority and responsibility has increased as my title changed, my duties in
11 each role have involved managing Seagate’s brand and marketing strategies, competitive analysis,
12 and campaign creation. These duties all involve marketing Seagate hard drives (“HDDs”).

13 4. It is my understanding that Seagate HDDs with model ST3000DM001 (the
14 “Drives”) are at issue in this action. The Drives were marketed under numerous names. The
15 internal products (“Internal Products”) containing the Drives at issue are: Barracuda and Desktop
16 HDD Internal Kit. The external products (“External Products”) containing the Drives at issue are:
17 Backup Plus Desk, Backup Plus for Mac, Expansion Desk, Expansion Desk Plus, GoFlex Desk for
18 Mac, FreeAgent GoFlex Home, FreeAgent GoFlex Desk, Business 1 Bay NAS, Business 2 Bay
19 NAS, and Business 4 Bay NAS.

20 **General Marketing of Seagate Products**

21 5. Seagate does not publish marketing materials (including Product Manuals,
22 Data Sheets, and Storage Solutions Guides) specific to the ST3000DM001 drive alone. Instead,
23 Seagate publishes marketing materials for specific products. The Internal and External Products
24 were either exclusively or partially manufactured with the ST3000DM001. In general, marketing
25 materials for Seagate’s external products do not reference internal drive ST numbers, therefore,
26 marketing materials for the External Products at issue here would not have referenced the
27 ST3000DM001. Marketing materials for the Internal Products may have referenced the
28 ST3000DM001, but there are no marketing materials for the ST3000DM001 itself.

1 6. Additionally, Seagate's webpages concerning external products do not
2 reference internal drive ST numbers. This means that the ST3000DM001 was never listed on
3 Seagate's website in connection with any of the External Products at issue here, either through
4 specifications tabs or through the publications discussed in Paragraph 5 above. The ST numbers
5 listed on Seagate's website for the External Products were the ST numbers for the chassis or box,
6 not the drive.

7 **Packaging Box Marketing for Products Containing the Drives**

8 7. Joy Basa, a Packaging Program Manager at Seagate, gathered all available
9 packaging box marketing from 2011 to February 2016 for both the Internal and External Products.
10 Ms. Basa relayed that the artwork is the only artwork available from Seagate's packaging artwork
11 repository. To the best of my knowledge, all of these materials have been produced to Plaintiffs in
12 this litigation and those attached hereto as **Exhibit 1** are true and correct copies.

13 8. Seagate never made any AFR representations on the packaging box
14 marketing for the Internal or External Products.

15 **Combined AFR Publication of "0.34%, 1%" on Website**

16 9. I understand that Plaintiffs claim Seagate published an AFR specification of
17 "0.34%, 1%" for products containing the Drives on its website at certain points in time. *See*
18 Motion, 7:1-2. This is not the case. Plaintiffs refer to archived copies of Seagate's webpages
19 marketing the Barracuda on April 28, 2012 and January 17, 2013 found on the Wayback machine
20 (Internet Archive). *Id.* (citing Hospodor Declaration).

21 10. I have reviewed the archived copies of Seagate's website to which Plaintiffs
22 refer. At these times, Seagate's website had summaries that combined information for many
23 models and sizes of drives together. As shown in the images below, the website grouped
24 information for all capacities of Barracuda drives (from 160GB - 3TB), with different speeds
25 (5900RPM, 7200RPM) different amounts of cache (8MB, 16MB, 32MB, 64MB), different
26 physical dimensions (including heights of 19.98mm, 20.17mm, 26.1mm), different areal densities,
27 etc. The website clearly stated that visitors could "Compare Barracuda Desktop Hard Drive
28

Models.” The combined AFR specification of “0.34%, 1%” was not an AFR representation for the Barracuda product.

(<https://web.archive.org/web/20120428124406/http://www.seagate.com:80/internal-hard-drives/desktop-hard-drives/>)

1. “At A Glance” Tab. The circled text shows that the various drives range from Capacities of 160 GB – 3TB, have different Spindle Speeds (5900RPM and 7200RPM) and have different amounts of Cache (8MB, 16MB, 32MB, 64MB). The highlighted text invites users to “Compare Barracuda Desktop Hard Drive Models.”

2. “Features” Tab. Although it is difficult to discern in this image, the “Height” specification (highlighted) lists three different heights. The “Areal Density” specification also lists a variety of areal densities.

<div>◀ AT A GLANCE FEATURES SPECIFICATIONS ▶</div>				

3. “Specifications” Tab. This specifications tab lists two different AFRs (“0.34%, <1%”) for the different sizes of Barracuda drive. It also lists four different “Average Operating Power” specifications (“5.9W, 6.19W, 6.7W, 8.0W”).

PRODUCT NAME	AREAL DENSITY	ENCRYPTION	AFR	MEAN TIME BETWEEN FAILURES	AVERAGE OPERATING POWER

The image shows a 3D rendering of a Seagate GoFlex Desk For Mac external drive box, laid out to show its various panels. The front panel features the Seagate logo, the product name 'GoFlex Desk For Mac' in a large, stylized font, and 'EXTERNAL DRIVE DISQUE EXTERNE' below it. It also includes a '3 Year limited warranty' and 'Garantie limitée de 3 ans' with a large '3'. A barcode is visible on the right side of the front panel. The side panel shows the product from a different angle, highlighting its slim profile and the 'Thunderbolt' and 'FireWire' ports. The back panel contains technical specifications, system requirements, and compatibility information in both English and French. It lists 'Inside the Box' contents, 'System Requirements' for Mac OS X and Windows, and 'Configuration système requise'. The bottom of the box features a large image of the drive unit with labels for 'Thunderbolt ports' and 'Power Alimentation'. The overall design is clean and professional, with a mix of black, white, and grey colors.
